16. April 2012 Prof. Kre/nr.

Dear Mr Wäsche,

In the meantime, I have had the opportunity to continue testing the Microdome coagulation electrode made available by your company. After modifying the settings in accordance with your recommendations, working with this electrode is now very convenient. In practice, I use it for coagulation of the dura during transnasal/transsphenoidal hypophysis operations. For this application, the electrode works very reliably and is very practical due to its bayonet-type and slender design.

Hoping you find my short statement useful, I remain with

best regards

Mit freundlichen Grüßen

Prof. Dr. med. T. Kretschmer
Chefarzt
